**Dr. Gilbert Burckart** is presently Associate Director for Pediatrics, Office of Clinical Pharmacology, U.S. Food and Drug Administration. Dr. Burckart has served on the faculties of four universities (Buffalo, Tennessee, Pittsburgh, Southern California) as a Professor of Pharmacy, Pediatrics and Surgery for 33 years prior to coming to the FDA. He has previously served as President of the American College of Clinical Pharmacy and as President of the American College of Clinical Pharmacology. He moved to the US FDA in 2008, and his duties include the direction of the Pediatric Clinical Pharmacology program within the Office of Clinical Pharmacology, and participation in the FDA’s Pediatric Review Committee. His present educational and research program focuses on pediatric drug development studies. E-mail: gilbert.burckart@fda.hhs.gov

**Dr. Jeff Barrett** is Senior Advisor at the Critical Path Institute (C-Path) serving as a critical liaison between C-Path and the pharmaceutical industry, foundations, and other key stakeholders, helping grow C-Path’s portfolio in drug development solutions, with a focus, but not limited to model-informed drug development (MIDD) and real world data (RWD) technologies. Jeff also has experience as Head of Quantitative Sciences at the Bill & Melinda Gates Medical Research Institute, and Vice President of Translational Informatics at Sanofi Pharmaceuticals. Jeff spent 10+ years at the University of Pennsylvania where he was Professor, Pediatrics and Director, Laboratory for Applied PK/PD at the Children's Hospital of Philadelphia. Jeff received his B.S. in Chemical Engineering from Drexel University and Ph.D. in Pharmacokinetics from University of Michigan. He has co-authored over 175 manuscripts, and is fellow of both ACCP and AAPS (where he has won numerous awards). Dr. Barrett was awarded for Exceptional Innovation and Advancing the Discipline of Pharmacometrics at the International Society for Pharmacometrics (2013) and elected ISOP Fellow (2017). He was a past acting chair of the FDA Advisory Committee for Pharmaceutical Science and Clinical Pharmacology; a voting member of the committee for 8 years. E-mail: jbarrett@c-path.org
Dr. André Dallmann works as Scientist for Systems Pharmacology at Bayer, Germany. He completed his PhD in Clinical Pharmacy at the University of Münster, Germany, in 2017. Thereafter, he worked as a postdoctoral researcher at the Pediatric Pharmacology & Pharmacometrics Research Center at the University Children’s Hospital Basel in Switzerland and joined the department of Clinical Pharmacometrics at Bayer in 2018. His research interests focus on in vitro to in vivo extrapolation for oral drug formulations, DDI modeling and the exploration of obstetric and neonatal pharmacology through PBPK modeling.

E-mail: andre.dallmann@bayer.com

Dr. Joga Gobburu is a Professor with the School of Pharmacy and the School of Medicine, University of Maryland, Baltimore, MD, USA. He held various positions at the US FDA between 1998 and 2011.

E-mail: jgobburu@rx.umaryland.edu

Dr. Daniel Gonzalez, Pharm.D., Ph.D., is an associate professor in the Division of Pharmacotherapy and Experimental Therapeutics of the UNC Eshelman School of Pharmacy. He has an adjunct appointment within the Department of Pediatrics in the UNC School of Medicine. He joined the UNC Eshelman School of Pharmacy in 2014 after completing a postdoctoral fellowship through the UNC-Duke Collaborative Clinical Pharmacology T32 Postdoctoral Training Program. Gonzalez received his Pharm.D. and Ph.D. from the University of Florida College of Pharmacy in 2008 and 2012, respectively. His research interests include pediatric clinical pharmacology and the application of mathematical modeling and simulation techniques to characterize the pharmacokinetics and pharmacodynamics of drugs, guide drug dosage selection, and improve drug safety in children. Gonzalez’s research program is funded by the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), and he has published >75 peer-reviewed publications and >40 abstracts.

E-mail: gonzalezd@email.unc.edu
**Dr. Dionna Green** is the Deputy Director of the Office of Pediatric Therapeutics in the Office of Clinical Policy & Programs in the Office of the Commissioner at the US FDA. The Office of Pediatric Therapeutics is charged with assuring access for children to innovative, safe, and effective medical products. Dr. Green has been with the US FDA since 2009 and originally worked as a Medical Officer in the Office of Clinical Pharmacology in the Center for Drug Evaluation and Research (CDER). Dr. Green’s training is in pediatric medicine and clinical pharmacology and her research interests include regulatory science and innovative pediatric clinical trial methodology.

E-mail:  
dionna.green@fda.hhs.gov

**Dr. Ibrahim Ince** has an interdisciplinary background in Biopharmaceutical sciences, Pharmacology and Pharmacometrics. After completing his PhD in 2013, he worked as a consultant PK-PD modeler at LAP&P in Leiden, The Netherlands. In 2014 he joined Bayer AG in Germany, where he currently works as Scientist for Systems Pharmacology and Medicine and Pharmacometrics leader in the field of oncology, infectious disease, cardiovascular disease and pediatric drug development in the department of Clinical Pharmacometrics. His research interests include various applications of PBPK modeling, such as PK translation to pediatric populations and other special populations, and preclinical to clinical extrapolations.

E-mail:  
Ibrahim.Ince@bayer.com
Dr. Alice Ke obtained her PhD in pharmaceutics from the University of Washington, Seattle, where her research was focused on the assessment of fetal and CNS drug distribution using clinical imaging techniques. She then accepted an ORISE fellowship in the Office of Clinical Pharmacology at the FDA, where she developed and validated PBPK and population PK models to support dose adjustment for pregnant women. After completing her fellowship, Dr. Ke was a research scientist in the Department of Drug Disposition and PK/PD at Lilly Research Laboratories, where she applied population PK and PBPK modeling & simulation techniques to provide model-based advice on the design of clinical pharmacology studies. Currently, Dr. Alice Ke is a senior Consultant and Scientific Advisor at Simcyp. She has over 10 years of experience in applying mechanistic modelling and simulation to influence drug research and development programs. Her research interests continue to center around the applications of PBPK and PK/PD modeling to predicting complex drug interactions and PK/PD in special populations. E-mail: alice.ke@certara.com

Dr. Mona Khurana has been a Pediatric Team Leader in the Division of Pediatric and Maternal Health in the Center for Drug Evaluation and Research at FDA since 2016. In this role, her efforts predominantly focus on working collaboratively with review divisions in the Office of New Drugs to promote pediatric development of small molecules and therapeutic biologics in all therapeutic areas. Dr. Khurana is board certified in general pediatrics and in pediatric nephrology. Prior to joining FDA in July 2009, Dr. Khurana was an Assistant Professor of Pediatrics at Children’s National Hospital in Washington DC where she primarily managed hospitalized children with kidney disease, including those requiring dialysis and kidney transplant. E-mail: Mona.Khurana@fda.hhs.gov
Efthymios Manolis is since 2007 a scientific officer in the European Medicines Agency (EMA). He is the focal point on pharmacometrics in the Agency. He had a central role in the establishment of the EMA modelling and simulation working party, and the organisation of many international workshops. He is author of multiple articles in peer reviewed journals. Before joining the Agency, Efthymios worked as modeller in industry. Efthymios obtained his pharmacy degree from the National University of Athens, Greece in 2002 and his MSc degree in PK/drug metabolism and modelling from Paris XI University, France, in 2003.

E-mail: efthymios.manolis@ema.europa.eu

Dr. Bernd Meibohm, Ph.D., is a Professor of Pharmaceutical Sciences and Associate Dean for Research and Graduate Programs at the College of Pharmacy, The University of Tennessee Health Science Center, Memphis, Tennessee. He received his pharmacy degree and doctoral degree in pharmaceutics from Technical University Carolo-Wilhelmina, Braunschweig, Germany. After completion of a clinical pharmacology research fellowship at the University of Florida in 1997, he joined the faculty of the University of South Carolina, and in 1999 the University of Tennessee. Dr. Meibohm’s scientific interests include pulmonary infectious and inflammatory diseases, pediatric pharmacotherapy and the application of quantitative modeling and simulation techniques in preclinical and clinical drug development, with specific focus on therapeutic proteins.

E-mail: bmeibohm@uthsc.edu
**Dr. Jill A. Morgan** is a Professor and Chair in Pharmacy Practice and Science at the University of Maryland School of Pharmacy. She received her Doctor of Pharmacy degree from the University of Illinois Chicago and completed pharmacy practice and pediatric pharmacy specialty residencies at the University of Maryland Medical Center in Baltimore, Maryland. She is a Pediatric Clinical Pharmacy Specialist with practice sites at the President’s Interdisciplinary GI clinic and the Children’s Hospital Intestinal Rehabilitation Program (CHIRP) at the University of Maryland Medical Center. For several years, Dr. Morgan has been teaching pediatric and neonatal pharmacotherapy to nursing and pharmacy students as well as medical residents. She has performed research in a variety of areas related to pediatrics. Dr. Morgan is the Director for the Pediatric Pharmacy Fellowship program. She is also a board-certified pharmacotherapy specialist.

**jill.morgan@rx.umaryland.edu**

---

**Dr. Clinton Stewart** is a Member in the Pharmaceutical Sciences Department of St. Jude Children’s Research Hospital, Memphis, TN, where he directs a translational research laboratory focused on developmental therapeutics for children with CNS malignancies. Clinton has a particular interest in the studying the CNS penetration of drugs in mouse models using microdialysis techniques. He received his BS in Pharmacy from Auburn University and PharmD from the University of Tennessee Health Science Center.

E-mail:  
**clinton.stewart@stjude.org**
Dr. John van den Anker, M.D., Ph.D., FAAP, FCP, is a Professor of Pediatrics, Pharmacology, Physiology, Genomics and Precision Medicine at the George Washington University School of Medicine and Health Sciences, Washington, DC and holds the Evan and Cindy Jones Endowed Chair in Pediatric Clinical Pharmacology. He also is the Eckenstein-Geigy Distinguished Professor of Pediatric Pharmacology at the University Children’s Hospital of Basel, University of Basel, Switzerland. Dr. van den Anker has been the President of the American College of Clinical Pharmacology (2016-2018) and twice the President of the European Society of Developmental, Perinatal and Paediatric Pharmacology (2006-2008 and 2017-2019). His awards include the Distinguished Investigator Award from the American College of Clinical Pharmacology (2008), the Distinguished Researcher award of the George Washington University (2012), and the Sumner J. Yaffe Lifetime Achievement Award in Pediatric Pharmacology and Therapeutics (2019) from the Pediatric Pharmacy Association. Over the past 30 years, Dr. van den Anker’s research has focused on developmental, neonatal and pediatric pharmacology. He has authored over 450 peer reviewed publications and has received NIH funding as well as funding from the European Union to support his research and the development of training programs in Pediatric Clinical Pharmacology. E-mail: JVandena@childrensnational.org

Dr. Alexander “Sander” Vinks, Ph.D., Pharm.D., FCP, is Professor of Pediatrics and Pharmacology at the University of Cincinnati, College of Medicine. He is the Cincinnati Children’s Research Foundation Endowed Chair and Director of the Division of Clinical Pharmacology. He serves as the program Director of the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) Pediatric Clinical Pharmacology T32 training program at Cincinnati Children’s Hospital Medical Center. He directs a multidisciplinary Pharmacometrics Center of Excellence, is Co-Director of Cincinnati Children’s Genetic Pharmacology Service, and is Scientific Director for Pharmacy Research in the Division of Patient Services. His research interests include pharmacokinetic-pharmacodynamic (PK/PD) modeling and simulation, systems pharmacology, physiologically-based pharmacokinetics (PBPK), pharmacogenetics/genomics, and the application of population and simulation methods to inform pediatric clinical trial design and therapeutic drug management through the implementation of model-informed precision dosing strategies. E-mail: sander.vinks@cchmc.org
**Dr. Jian Wang**, Ph.D., is Associate Director for Regulatory Science at the Office of Specialty Medicine, Office of New Drugs, Center for Drug Evaluation and Research at the US Food & Drug Administration (FDA). He obtained his PhD in Pharmacology and pharmaceutics science from the University of Southern California.  
E-mail: Jian.Wang@fda.hhs.gov

**Dr. Yaning Wang**, Ph.D., is the Director of the Division of Pharmacometrics in the Office of Clinical Pharmacology at FDA. Before joining FDA, Dr. Wang received his Ph.D. in Pharmaceutics and master’s degree in Statistics from the University of Florida from 1999 to 2003. He also obtained a master’s degree in Biochemistry (1999) from National Doping Control Center and a bachelor’s degree in Pharmacy (1996) from Peking University in China. Dr. Wang oversees reviews, research projects, and policy development within the Division of Pharmacometrics for all disease areas.  
E-mail: yaning.wang@fda.hhs.gov

**Dr. Jun Yang** is a Member (Professor) in the Department of Pharmaceutical Sciences, Department of Oncology at St. Jude Children’s Research Hospital. His research program focuses on genomics-guided precision medicine for pediatric cancers, especially the pharmacogenetics of adverse drug effects and its clinical implementation. With childhood acute lymphoblastic leukemia (ALL) as a model disease, his group is a leader in using genome-wide association studies (GWAS) to discover genetic risk variants related to a variety of leukemia treatment response and toxicity phenotypes, many of which have direct clinical relevance. Dr. Yang’s group is part of the National Institutes of Health Pharmacogenomics Research Network and he serves as the Co-leader of the Center for Precision Medicine in Leukemia. Dr. Yang is a member of the Children’s Oncology Group.  
E-mail: jun.yang@stjude.org
Dr. Lynne Yao, M.D., is the Director, Division of Pediatric and Maternal Health in the Office of New Drugs, Center for Drug Evaluation and Research. Dr. Yao received a B.S. degree in Biology from Yale University, and an M.D. degree from the George Washington University School of Medicine. She is board certified in both Pediatrics and Pediatric Nephrology. Prior to joining FDA, Dr. Yao was the Director of Dialysis and Associate Pediatric Residency Program Director at the Inova Fairfax Hospital for Children in Fairfax, VA. She has been with the FDA since 2008. The Division of Pediatric and Maternal Health oversees quality initiatives which promote and necessitate the study of drug and biological products in the pediatric population; and improve collection of data to support the safe use of drugs and biological products in pregnant and lactating individuals. She collaborates with numerous stakeholders both inside and outside of FDA to advance development of safe and effective therapies for children, and pregnant and lactating women.

E-mail: lynne.yao@fda.hhs.gov

Dr. Hao Zhu, Ph.D., is the deputy director at the Division of Pharmacometrics, Office of Clinical Pharmacology, Center of Drug Evaluation and Research, U.S. Food and Drug Administration (FDA). Dr. Zhu received his Ph.D. in pharmaceutical sciences and Master in statistics from the University of Florida. He started his career in modeling and simulation teams in Johnson & Johnson and Bristol-Myers-Squibb. He joined FDA as a pharmacometrics reviewer more than 13 years ago. His division reviews the pharmacometrics related submissions and supports pharmacometrics-related policy development.

E-mail: hao.zhu@fda.hhs.gov
