

Shaping the Future of Pediatric Development

M-CERSI Workshop: July 24-25, 2026

Trupti Dixit, PhD MBA

PEDIATRIC DOSAGE FORM DEVELOPMENT WORKSHOP

Welcome!

Over 105 Participants Representing

Industry

Academia

Government

Bringing diverse perspectives to **scalable pediatric dosage form development**.

Let's Get Started →

Shaping the Future of Pediatric Development

Patient & Caregiver Voice

- Needs & Quality of Life
- Treatment Acceptability

Developer's Perspective Formulation & Innovation

- Age-Appropriate Formulations
- Drug Delivery Innovation

Regulator's Perspective Safety & Guidelines

- Safety Standards
- Regulatory Pathways

Collaboration Opportunities Government & Private

- Public-Private Partnerships
- Global Collaboration

Working Together for Safe & Innovative Pediatric Therapies

Why are we here?

Goal

To foster dialogue, share best practices, and **identify actionable** strategies that can advance the development of ***safe, effective, and acceptable*** medicines for children.

Better Understanding

- Align patient, regulatory, and developer perspectives to Inform acceptable dosage-form development

Publications & Outcomes

- Capture key discussions and outcomes from workshop sessions and publish shared findings in the next 12 months

Collaboration Opportunities

- Identify joint approaches across the pediatric community to advance pediatric dosage form development through partnership

Thank you!!

- Industry Sponsors
- Our hosts- M-CERSI Team especially Dana Hammell, Melissa Bresnahan and Dr. James Polli
- Planning committee that included representatives from FDA, IQ Consortium's pediatric working group, EuPFI (European Pediatric Formulation Initiative) and NIH/NIAID
- Dr. Daniel Schaufelberger and Dr. Steven Hoag for concept development and persisting to make it happen!
- And YOU all!
